Objective and Features of the Fund

1. Objective of the Fund

The Fund aims at the investment performance linked to the NOMURA-BPI Overall (NOMURA-Bond Performance Index Overall)* (hereinafter referred to as the "Benchmark Index"), which means NAV volatility is to correspond with that of the Benchmark Index.

* NOMURA-BPI Overall is the investment yield index published by Nomura Securities Co., Ltd., describing the trends of the whole market of publicly offered bonds bearing interest issued in Japan, and calculated based on the performance of the bond portfolio composed in accordance with certain inclusion criteria.

2. Features of the Fund

■ Main subject of investment

- Japanese public and corporate bonds are to be the substantial and main subject of investment*.
- The Fund may use derivatives, such as the bond futures market, to keep the investment performance effectively linked to the Benchmark Index.
- * The "substantial and main subject of investment" means the main subject of investment to which investment is made through a "NOMURA-BPI Overall mother fund". The Fund may invest into Japanese public and corporate bonds directly.

■ Investment Policy

- (i) The Fund is investing in Japanese public and corporate bonds as the substantial and main subject of investment, and the Fund aims at investment performance linked to the Benchmark Index.
- (ii) The Management Company decides the investment ratio of the mother fund, taking efficiency, etc., into consideration.
- (iii) For the purpose of targeting investment performance effectively linked to the Benchmark Index, the Management Company may primarily use derivatives, such as bond futures, for purposes beyond hedging, to realize gains and losses that are equivalent to those that arise as a result of holding assets that are subjects of investment, or to decrease the foreign exchange rate fluctuation risk, etc.

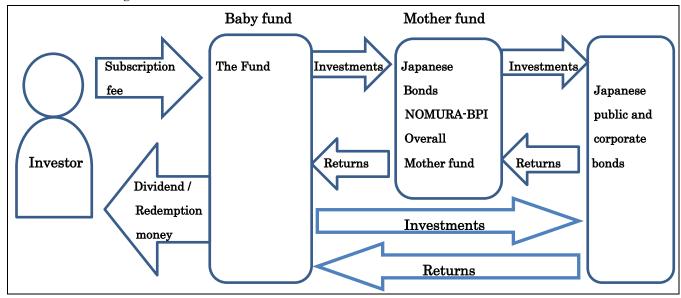

■ Copyright, etc., of NOMURA-BPI Overall

The intellectual property rights and any other rights in NOMURA-BPI Overall belong to Nomura Securities Co., Ltd., Nomura Securities Co., Ltd., does not guarantee accuracy, completeness, reliability, usefulness, marketability, merchantability and fitness of the Benchmark Index, and does not account for performance of the Fund with the use of the

Benchmark Index.

Management described above may not be achieved depending on funding trends, market trends, etc.

• The Fund is managed on a family fund method, a method where investment is made through a mother fund.

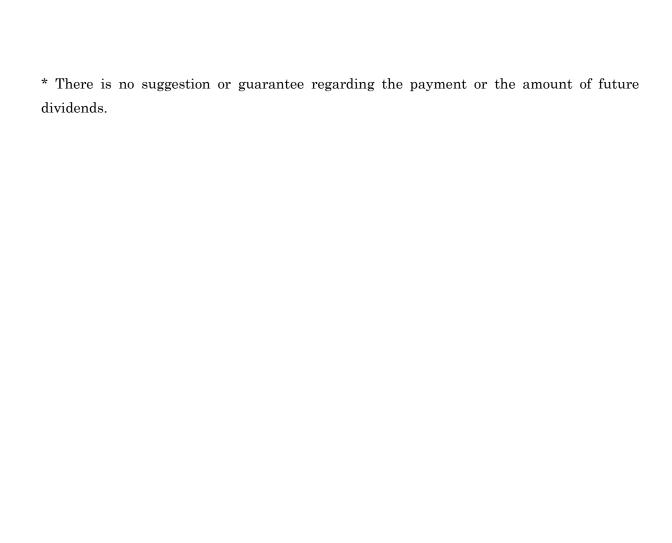

■ Investment Restrictions

Investment ratio in stocks	The Fund does not directly invest in stocks.
	Investment into stocks is only allowed when
	convertible bonds are converted into shares. The
	investment amount in shares must be not larger
	than 5 % of the NAV of the trust property.
Investment ratio in assets	The Fund does not invest in assets denominated in
denominated in foreign currencies	foreign currencies.
Use of derivatives	Use of derivatives is not restricted to hedging
	purposes.

■ Distribution Policy

- -Dividends are due on the $7^{\rm th}$ of March and September of each year.
- -As a general rule, the full amount of dividends and other income^{**} arising from the trust assets are distributed after deduction of expenses. However, the amount of dividends that are payable may in some circumstances amount to zero. Even if any profits are realized from the sale and purchase of individual securities, no dividends shall be paid.

^{* &}quot;Full amount of dividends and other income" includes interest income and other proceeds.

Investment Risks

1. Factors that contribute to NAV volatility

The NAV of the Fund is subject to fluctuations in the prices of the securities, etc., in which the Fund invests. All profits and losses arising from fund management are borne by the investors. Any principal invested in the Fund by investors is therefore not guaranteed. Investors may incur a loss and the value of their investment principal may fall below par as the result of a decline in the NAV. The investment trust differs from a savings deposit.

Bond Price Fluctuation Risk	Bond (such as public and corporate bond) prices can fluctuate
	due to fluctuations in market interest rates, fluctuations in
	the credit of the bond issuers, etc., which may affect the NAV
	of the Fund since the Fund substantially invests in these
	bonds.

^{*} The factors that contribute to fluctuations in the NAV are not limited to those mentioned above.

<< Primary Factors for Discrepancies between the Benchmark Index and NAV>>

The Fund aims at an investment performance for NAV volatility linked to that of the Benchmark Index; however, in managing the investment assets, we cannot guarantee that movements will be identical to those of the Benchmark Index primarily for the following reasons:

- (i) There is a difference between individual items' incorporated ratio in the Fund and the component proportion of component items in the Benchmark Index.
- (ii) When portfolio adjustments are made, there may be a price spread between the sale price of individual items and the appraised value of the Benchmark Index.
- (iii) There might be a disparity between (a) the timing of capital flow due to an additional issue or partial cancellation of the Fund, etc., and (b) the time of the individual items, etc., are actually traded in accordance with the said capital flow.
- (iv) There may be a disparity between the appraised value of certain item in the Fund and that of the same item in the Benchmark Index.
- (v) The futures transactions to be made are different from those targeting the Benchmark Index.
- (vi) The Fund bears certain costs, such as trust fees.
- * The factors that contribute to the discrepancy between the Benchmark Index and NAV are not limited to those listed above.
- * The above also applies to the case where investments is made through a mother fund.

2. Additional Considerations

The provisions stipulated in Article 37-6 of the Financial Instruments and Exchange Act (so-called "cooling off") are not applicable to subscriptions to the Fund.

 Management based upon the investment policy may not be achieved depending on funding trends, market trends, etc., or unexpected circumstances.

- The interest/liquidation payment from the issuers of the securities which are substantially incorporated into the Fund may be delayed.
- Transactions pertaining to the Fund, such as an investment in securities and contracts related to such fund, may default because of the bankruptcy, or other similar event, occurring to a counterparty.
- NAV of the Fund and the Benchmark Index may differ because of costs and other factors. It
 is not guaranteed that the Fund's investment performance will track or exceed the
 Benchmark Index.
- The NAV of the Fund may be influenced in the event that transactions of securities are made in a mother fund which the Fund invests in, due to changes in the capital in its baby fund.
- The market price of the Fund is based upon supply and demand, as calculated through competitive buying and selling on the exchange. Therefore, market price may differ from the NAV itself.
- Please be aware that the Fund will be delisted and the trust will be terminated if the number of units of beneficial interest falls below 500,000 for 20 successive business days.

3. Risk Management System

The Management Company examines Fund performance and oversees management risks by having established a committee to take charge of these matters.

- Examination of the Fund performance

 The committee reports and deliberates on the results of periodic examinations

 (analysis/evaluation) of the investment trust's trust asset performance results.
- Administration of management risk

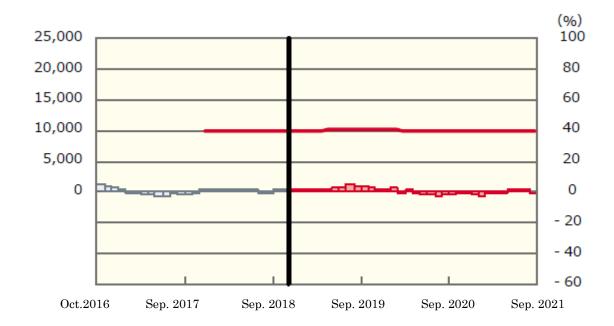

The committee identifies and manages management risk and, based on its findings, provides guidance to the appropriate divisional management and any other relevant sections regarding rectification measures for appropriate administration.

The Fund's annual return (Right Axis)

Benchmark Index annual return (Right Axis)

Dividend re-investment net asset value (Left Axis)

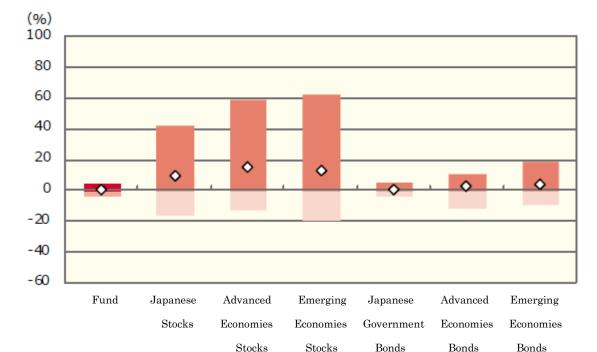

^{*} The dividend re-investment net asset value is calculated by deeming the dividend, as determined before the application of income taxes, to be re-invested. The dividend re-investment net asset value is set by indexing the original principal as 10,000 (per 100 units), and is displayed from the end of the month that includes the inception date.

^{*} The annual return displays the return in a single year at the end of each month for the five years from October 2016 to September 2021. However, the Benchmark Index annual return is only displayed up through November 2018.

^{*} Not all asset classes are the subject of Fund investment.

^{*} The above graph displays the Maximum Value, the Minimum Value and the Average of the annual return at the end of each month for the five years from October 2016 to Septmber 2021. However, prior to the inception date, the annual return of the Fund was calculated by using the Benchmark Index of the Fund.

^{*} The above numbers may not apply as of the account closing day.

^{*} The Fund uses the return of the dividend re-investment net asset value.

[#] The dividend re-investment net asset value may occasionally differ from the actual net asset value

due to the dividend being deemed re-invested before the application of income taxes.
